

BLASTWIZARD® KWIKBLAST 30

Includes a 10m blast hose and nozzle

A popular mobile wet blast system — the Blastwizard® Kwikblast 30 has been engineered to be the lightest and most manoeuvrable system in the Blastwizard® Kwikblast range. With a blasting time of approximately 45 minutes, the Blastwizard® Kwikblast 30 delivers outstanding power and performance every time.

It has been specifically designed to hold one full bag of garnet and has a slightly larger cabinet, making it easier to service. The Blastwizard® Kwikblast 30 is very much a cross industry favourite.

Perfect for those small awkward jobs in confined and hard to reach places and particularly good for delicate projects where the pressure can be turned right down to less than 20psi. Alternatively it can be turned up to 80psi when you want the power and performance of a larger Blastwizard® Kwikblast but in a smaller package.

Dimensions

Height	830mm
Width	520mm
Depth	650mm
Unladen Weight	67.2kg
Laden Weight	104kg (garnet)

Specifications

Water Pressure & Flow	Standard tap pressure & flow
Water Consumption	40 – 80ml per minute
Grit Type	Standard particle blast media
Grit Consumption	0.5 – 1.1kg per minute
Blasting Time	Up to 45 mins between refills
Air Supply	40 – 90cfm
Air Supply Hose	¾ inch
Blast Hose Size	¾ inch
Blast Hose Max Length	50m
Blasting Pressure	20 – 80psi

Blast Media

Garnet – 1 bag
Iron Silicate – 1 bag
Glass – ¾ bag
